ABOUT ME

I'm a Senior Software Engineer based in Mumbai, India, specializing in Laravel, PHP, and MySQL. I also work with Redis, Filament, AWS, Tailwind CSS, and AI-assisted development tools. Currently building warehouse and fulfillment systems at Lyra WMS (Netherlands). As a core team member of the Laravel Mumbai Community, I stay close to modern PHP practices. I thrive in collaborative environments, ship reliably under pressure, and keep learning. Beyond coding, I love to swim and cook.

SKILLS

Skills: Laravel · PHP · MySQL · Redis · Filament · AWS · Node.js · Java · Tailwind CSS · REST APIs · AI / LLMs

WORK EXPERIENCE

Lyra WMS

Mumbai / Groningen, Netherlands

Senior Software Engineer

Mar 2025 — Present

- Build and optimize core backend systems for a European warehouse management platform covering fulfillment, inventory, order management, and automation.
- Ship production features on a Laravel/PHP stack with a focus on reliability, maintainability, and operational efficiency for warehouse workflows.
- Collaborate across product and engineering to improve mission-critical logistics flows used by warehouses across Europe.

Joistic Technologies

Mumbai, Maharashtra

Senior Backend Developer

Mar 2024 — Feb 2025

Achievements:

- Successfully delivered 18+ MVP projects, including 8 projects built completely from scratch, demonstrating strong project initialization and execution capabilities.
- Architected and developed 2 internal products.
- Led development of multiple projects using the Filament admin panel, reducing development time while maintaining code quality.
- Integrated AI services and LLMs across projects (OpenAI GPT-4, GPT-3.5, Anthropic Claude) for content generation, image processing, and related features.
- Designed and implemented scalable RESTful APIs for cross-platform mobile applications.
- Implemented service-based architecture patterns for maintainable, scalable codebases.
- Utilized Redis caching strategies to optimize application performance and reduce database load.
- Integrated multiple payment gateways and third-party services while maintaining robust security standards.
- Worked directly with non-technical startup founders.
- Reduced development cycles by 30% through efficient use of Filament and the TALL stack.

edge CRM — Your Strategic Growth Partner.

Mumbai, Maharashtra

Sr. Software Solution Engineer

Dec 2022 — Mar 2024

Internal Achievements:

- Recognized as a leader and a vital member of the Ignite Leadership Team.
- Initiated the Laravel Mumbai community meetup.
- Orchestrated the first JSlovers meetup in Mumbai.

E-commerce Food delivery portal (US Client):

- Created the project from scratch; strategized and designed the system and database.
- Led a backend team, defining responsibilities for optimal project execution.
- Successfully implemented multi-tenancy functionality.
- Integrated payment gateways, fulfillment services, BPM, and shipment services seamlessly.
- Automated the system with multiple cron jobs and used packages to enhance performance.
- Implemented a service-based design pattern for robust scalability.
- Enhanced system speed with Redis cache and strengthened API security with custom middleware.
- Implemented queues for efficient handling of asynchronous tasks.

Asia's Largest government body (BMC):

- Led 3 projects for BMC as a backend developer.
- Built an offline ticketing system from scratch with multi-device sync to the server.
- Improved security by 50% on a project where multiple PII APIs were exposed.
- Integrated multiple payment gateways across systems.
- Automated 25% of processes with CRON jobs; made export functionality 10x faster.
- Reduced production issues by 70% through refactoring and optimization.
- Delivered multiple modules and provided APIs for iOS and Android apps.

Big Rattle Technologies

Software Engineer

Mumbai, Maharashtra

Oct 2021 — Dec 2022

- Designed a web-based application that made insurance issuance faster and more comfortable for users.
- Created well-structured client requirement documentation that improved team efficiency by 30%.
- Optimized existing code to make the client website ~20% faster.
- Encrypted user PII data in the database, improving security by ~35%.
- Developed numerous backend APIs and consumed them on the frontend.
- Upgraded the entire project from Laravel/PHP 5.8 to Laravel/PHP 9 for speed and security.

Tekno Point

Trainee Developer

Mumbai, Maharashtra

Jun 2021 — Nov 2021

- Created APIs using Java Servlets which helped clients process faster.
- Solved production issues with MySQL queries, reducing user complaints by 20%.

Hasbasoft Technology Pvt Ltd

Back End Developer

Mumbai, Maharashtra

Nov 2019 — Apr 2020

- Learned Java, SQL queries, and programming ethics.
- Worked on an e-commerce project with a Java backend and SQL database.

EDUCATION

Manipal University Jaipur

MCA

Apr 2026

University of Mumbai

BSc IT

May 2021
